Local partner with a global approach

SystemTeknik A/S is a financially sound company, founded in 1953 under the name Aalborg Dynamotor. Today, the company is owned jointly by Jysk-Fynsk Kapital A/S and the company's management, and is Denmark's leading supplier of panel and switchboard solutions. The company provides:

Projects and service – Tailored control technology and power distribution solutions. Software development for PLC and SCADA systems. Installation and plant commissioning.

Standardised solutions OEM – Manufacture of high volume standard solutions for OEM customers.

Component sales – Sale of components and solutions from agents and selected suppliers.

We are a thoroughly modern company with a global reach based in Northern Jutland. In addition to our Danish site we also have production facilities in Poland and China and a sales office in Norway.

Our objective:
To be a local partner with a global approach

Proven quality

Over time, System Teknik A/S has achieved certification in a number of areas. Tangible evidence of the quality standards which we work to and are known for.

- We are **ISO 9001:2008** and **ISO 14001:2004** DS-certified.
- We are **UL**-certified, meaning that we can supply approved panels and switchboards to the American market.
- We are **Achilles** certified (ID number 26558). This pre-qualifies us for Scandinavian oil and gas projects.
- We have extensive **ATEX** experience, meaning that we can work in a number of sectors where gases, flammable liquids or combustible dust make operating environments hazardous.
- We are **GOST** certified, meaning we are qualified to supply solutions to the Russian market.
- We are **KEMA KEUR** certified, meaning that System Teknik meets all current defined legislative requirements for the manufacture of CUBIC low-voltage main and distribution switchboards. **KEMA KEUR** approval gives us unlimited access to a number of international markets.

Highly qualified staff

Our employees' skills are our company's most important asset. They're your and our guarantee that the job will be done to the highest standards and in the most professional manner possible. All our staff are highly skilled specialists who are experts in their fields.

Our staff always put the customer first, at all stages of the project. Plus, regular training and skill updates ensure that System Teknik A/S is constantly prepared to provide you with the qualified and competent partner you need.

Rittal – The System.

Faster – better – worldwide.

Projects and service

- From design to completed project

SystemTeknik A/S have the skills and the employees to provide qualified consultancy services right from the initial design phase to project completion.

Our full service control technology and power distribution projects are individually tailored to customer requirements. We can provide active assistance right from project management, engineering, construction, documentation, production and commissioning to after-sales and service.

During the construction process we benefit from many years of experience with technical solutions tailored to the product's operating environment, including demanding sealant standards, thermic environments, maritime applications, earthquake-safe solutions, hazardous environments, on and offshore environments and military applications. All our deliveries are subject to final testing, and as part of the commissioning process we ensure that end users and operational personnel are properly instructed in the product's use.

24-hour service

At SystemTeknik A/S we put our customers first, and for us service means service. For example, you can come into contact with a SystemTeknik specialist at any time. Our customers can choose to benefit from a 24-7 hotline service that's available all day every day throughout the year.

Many of our customers make extensive use of our switchboard servicing service. Our service engineers benefit from in-depth knowledge of products from leading switchboard manufacturers and perform switchboard servicing all over the world. Plus, we always ensure that our switchboard engineers are kept fully up to date with the very latest sector developments and technologies.

Our services:

- Repairs – expansions – rebuilds.
- Service and maintenance of circuit breakers. Schneider certified – Level 3.
- Spare parts.
- Commissioning of inverters.
- Thermography.
- Voltage quality measurements.
- Energy registration and optimisation.
- Customer portals for efficient document management.
- 24/7 servicing by agreement.

Standardised solutions – OEM

Standardised solutions are based on accumulated knowledge and a significant degree of repetition.

Standardised solutions are like building blocks that can be combined to generate solutions that are tailored to your specific requirements.

Customer-tailored web-portals can deliver fast and efficient data and documentation exchange available as and when you need it.

Sectors for which OEM customer solutions are relevant include the maritime industry, ventilation, hydraulics, pump plants and wind energy.

Our services:

- Product development in cooperation with the customer.
- Cost optimisation of the existing solution.
- Development of pricing tools for effective costing.
- Customer portals for efficient document management.
- Efficient manufacture using standard modules and existing knowledge to cut costs.
- Solutions manufactured and supplied from our global manufacturing sites.

Sales of components and equipment

At SystemTeknik A/S we provide direct wholesale services and technical solutions including components and transmission equipment for industrial and maritime use as well as spare parts for switchboards.

We have a wide and varied product range constantly in stock including components for which we are the exclusive agents, as well as products from market-leading suppliers. This allows us to find the best possible equipment solution in co-operation with the customer. Plus, of course, all our components meet the relevant regulatory requirements for automation and control equipment.

Our external sales staff cover the whole of Denmark, and can provide local supplier services.
